Fund Investment Summary and Objectives

Our Investment Strategy and Philosophy

Shares are evaluated, not by a fluctuating ticker or a graph on a screen, but by what they represent, a certificate of ownership. We seek great businesses that are well run and managed, trading at a discount to their intrinsic value. We follow the adage that the return of an investment is determined not by the exit price but by the price one pays.

Fund Objective

The objective of the Aylett Balanced Prescient Fund is to maximise long term capital appreciation by investing in assets on behalf of clients that will preserve their purchasing power in real terms and earn a satisfactory return on that capital.

Fund Universe

The maximum net equity exposure of the Aylett Balanced Prescient Fund is 75%, with offshore asset exposure being limited to 25%. This fund is managed to comply with the investment limits governing retirement funds.

Fund Risk Profile

The Fund has a moderate risk profile as it is actively managed across global equities, cash and listed assets.

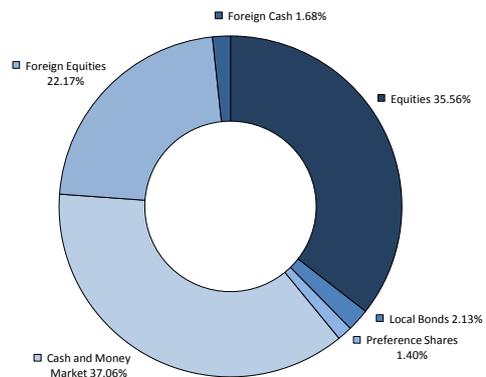

Aylett Balanced Prescient Fund vs. Benchmark

**Total Return Index is net of fees and assumes dividends and distributions are reinvested and the source is Bloomberg; inception to end 31 March 2016. Cumulative outperformance since inception is -11.3%. ** For illustrative purposes only.

Asset Allocation

Fund Manager Commentary:

At first glance, an investor may be struck by how different our fund looks when compared to other Regulation 28 funds. It is dominated by small caps and out-of-favour stocks that could not ordinarily be found in the larger funds. Companies such as Bowler Metcalfe, Transaction Capital, Transpaco, ReCM & Calibre, Italtile and RB Platinum are simply too small to make a difference to fund managers with more than fifty billion Rand in assets under management. Furthermore, out-of-favour stocks such as Afrox, Sovereign, Tsogo Sun and Reinet give the fund an eclectic feel which should result in the benefit of uncorrelated returns in the long run.

Our offshore exposure had a particularly tough time last year but we chose to retain the holdings and it feels as though the market is starting to appreciate their value. In particular, Berkshire, which is a large holding, is looking very attractive on all measures. Karelia recently came out with a reasonable set of results and is still cheap for a European tobacco company.

We continue to avoid bonds and property preferring to hold short term paper yielding about 8%. For now, holding cash will allow us to be selective should markets correct.

As a final comment, our fund is attracting the attention of new investors which is pleasing for us as it would appear that they appreciate our independent and rational way of thinking.

Walter Aylett

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the Net Asset Value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the Net Asset Value price as agreed to. Money Market Funds are priced at 1pm and all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Manager on request.

For any additional information such as fund prices and application forms please go to www.aylett.co.za.

Risk Profile

Medium / Medium - High:

- These portfolios generally hold more equity exposure than low risk portfolios but less than high risk portfolios
- In turn the expected volatility is higher than low risk portfolios, but less than high risk portfolios
- The probability of losses are higher than that of the low risk portfolios but less than high risk portfolios
- Expected potential long term investment returns could therefore be lower than high risk portfolios due to lower equity exposure, but higher than low risk portfolios

Glossary

Annualised performance: Annualised performance shows longer-term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The Net Asset Value represents the assets of a Fund less its liabilities.

Composite Index: 60% SWIX Total Return Index, 20% All Bond Total Return Index, 15% World MSCI, 5% Cash STEFI
