Fund Investment Summary and Objectives

Our Investment Strategy and Philosophy

Shares are evaluated, not by a fluctuating ticker or a graph on a screen, but by what they represent, a certificate of ownership. We seek great businesses that are well run and managed, trading at a discount to their intrinsic value. We follow the adage that the return of an investment is determined not by the exit price but by the price one pays.

Fund Objective

The objective of the Aylett Equity Prescient Fund is to maximise long term capital appreciation by investing in assets on behalf of clients that will preserve their purchasing power in real terms and earn a satisfactory return on that capital.

Fund Universe

The Aylett Equity Prescient Fund is required to invest a minimum of 80% of the portfolio in equities at all times, with offshore asset exposure being limited to 25%.

Fund Risk Profile

The Fund has a moderate to high risk profile as it is actively managed across global equities, cash and listed assets.

Aylett Equity Prescient Fund vs. JSE All Share TRI

**Total Return Index is net of fees and assumes dividends and distributions are reinvested and the source is Bloomberg; inception to end 31 March 2016. Cumulative outperformance since inception is 22.5%. ** For illustrative purposes only.

Asset Allocation

Fund Manager Commentary:

The first quarter was a mixed one in which we had a very good January and February followed by a March that took back almost all our outperformance. The volatility has been extreme and it has been a difficult environment in which to operate. Furthermore, clients have been nervous and we have seen inflows and outflows across all our funds; these flows present a challenge as we try and invest/divest as required.

Fortunately, our contrarian, out-of-favour investments have started to work for us and it is pleasing to see stocks such as Transpaco, Royal Bafokeng, and Bowler Metcalf come through for us, while our lack of exposure to market favourites such as Naspers provided us with good relative performance. Our out-of-favour investments in financials have also stood us in good stead. We were pleased to see Anglos recover nicely; something that continues into the new quarter.

Our detractors were mainly stocks we do not own such as gold (e.g. Anglogold), Shoprite, Bidvest, Steinhof and Sasol; a favourite of the larger fund managers. Essentially, as in the past, detractors of our performance tend to be errors of omission rather than errors of commission.

Going forward, our fund is very well placed with a number of small caps not owned by many fund managers, which have exciting prospects for the longer term. We also have a high exposure to banks, which we believe are not expensive relative to their history. The portfolio's exposure to commodities as a sector continues to increase, and we believe we will be more than adequately compensated for the recent volatility.

Offshore, our stocks remain very attractive; all the more so as a result of recent price movements. We are particularly excited about Berkshire Hathaway Inc., mainly because of the conservative nature of Warren Buffett's approach to earnings and the net asset value of the underlying business. The future, as always, is uncertain and fraught with risks; however, we believe that Berkshire has the ability to withstand any unforeseen shocks.

Walter Aylett

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs(TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the Net Asset Value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the Net Asset Value price as agreed to. Money Market Funds are priced at 13:00 and all other Funds are priced at either 15:00 or 17:00 depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Manager on request.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to

Risk Profile

Medium / Medium - High:

- These portfolios generally hold more equity exposure than low risk portfolios but less than high risk portfolios
- In turn the expected volatility is higher than low risk portfolios, but less than high risk portfolios
- The probability of losses are higher than that of the low risk portfolios but less than high risk portfolios
- Expected potential long term investment returns could therefore be lower than high risk portfolios due to lower equity exposure, but higher than low risk portfolios

Glossary

Annualised performance: Annualised performance shows longer-term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The Net Asset Value represents the assets of a Fund less its liabilities.
