### Fund Description:

The Aylett Hedge Fund seeks to adopt a multiple strategy approach. This is achieved by making use of tools such as asset allocation, stock picking, arbitrage, opportunistic trading as well as option and derivative contracts. Shorting, gearing and leveraging form a small part of this tool kit.

The fund achieves its objective by having an unfettered approach to asset allocation and executing strategies only, when on balance the probabilities are in favour of the investor.

Due to the nature of this product, the Aylett Hedge Fund is currently only marketed to qualified investors. Hedge Funds are unregulated financial products.
